

Dr Paul J Huntly
Global Leader DNV Biorisk

Personal Statistics

Nationality : UK

Language Capabilities

Fluent : English

Professional Experience Summary

Paul Huntly is a Principal Consultant with DNV specialising in risk assessment associated with biological systems, and in particular studies relating to laboratory safety measures, BSE, food safety and other sources of microbial risk. Paul has provided consultancy advice on biorisk and conducted audits and assessments for a variety of organisations, including A*STAR (Singapore), CCDC, the Swedish National Institute for Infectious Disease, Health Canada, RIVM (the Netherlands), and GSK Biologicals (Belgium). A microbiologist by training, Paul has since specialised in systems-based approaches to management and risk assessment in scientific environments. Paul is currently Global Leader for biorisk within DNV, encompassing all areas relating to risk associated with biological organisms and their products.
