

SeaSkill – Learning Programmes

Certification of Learning Programmes

Purpose

To ensure a uniform quality of training within the maritime industry, independent of location, operation or training method.

Features

The certification of learning programmes is available to training providers and manufacturers offering learning programmes with their equipment. Certification is to DNV's Standards for Learning Programmes and relevant industry standards. The certification process covers:

- The curriculum
- Learning objectives and schedules
- Teaching aids
- The examination process
- Qualification of trainers

Benefits

The certified learning programme provides assurance that its content is correct and well structured, in alignment with industry needs and requirements and will result in a higher degree of student satisfaction. The certified programme has consistent quality delivered by approved trainers and its quality is recognised by industry and maritime administrations worldwide through its certification by a trusted international third party.

By certifying a Learning programme you ensure that:

- Courses are well structured
- The learning objectives are clear
- Instructors have adequate competence
- The required equipment and facilities for the course are available
- The content complies with the relevant standards or guidelines (e.g. SIGTTO, IMO Model Course, DNV Competence Standard)
