

SeaSkill – MET

Certification of Maritime Education and Training

Purpose

To verify the quality of maritime training providers globally to a uniform standard.

Features

The Maritime Education and Training Standards are designed for training providers in order to facilitate compliance with STCW-requirements. The certificate is valid for five years. All training activities provided according to this standard are to be developed, planned, operated and evaluated by analysing the interrelationship between the following:

- Purpose
- Objectives

- Methods/learning process
- Content
- General conditions
- Evaluation

Benefits

- Certification will strengthen the maritime education and training's reputation and market recognition.
- Increased awareness of objectives and more aligned efforts to reach them.
- The training provider will be positively distinguished from non-certified institutions and the relation to the government and ship managers will be improved.
