

# SeaSkill – Simulator Systems

## Certification of Simulator Systems

### Purpose

To ensure that the simulations provided by the simulator include an appropriate level of physical and behavioural realism in accordance with recognised training and assessment objectives.

### Features

Maritime simulators that comply with the standard's requirements will receive a Product Certificate for a "Maritime Simulator". The simulator's function area and the class according to this standard will be stated on the certificate. A manufacturer offering a simulator for examination or mandatory simulator training that complies with the requirements of this standard may

request verification to obtain a "Statement of Compliance".

### Benefits

Certification to the Maritime Simulator Systems standard ensures that:

- Simulator systems used for mandatory training conform to international requirements.
- Simulations have the relevant level of physical and behavioural realism in accordance with recognised training and assessment objectives.
- Simulator centres have properly installed and configured simulator equipment.
