

# DNV Summit

## Improved performance, better measurement, faster auditing

DNV Summit is an auditing tool for the assessment of DNV's wide range of management system protocols. Summit provides key support to the continuous improvement of your management system of your business.

All of DNV's audit protocols are available for use in DNV Summit including ISRS™ and DNV Prosper™. Alternatively DNV can provide customised protocols, tailored to your exact Management System

requirements. This service can range from simply adding elements to standard protocols reflecting your business needs, to more fundamental customisation.

### Benefits:

**On-line auditing** provides efficient one time entry of findings and safe storage of results.

**Audit integration** allows team collaboration on audits across the management system for more efficient and effective auditing.

**The import and export facility** allow instant sharing of audit findings with other Summit users for better communication, interpretation and reporting of results.

**Instant report generation** provides immediate information on the results of the audit, saving time and effort.

**Intuitive tools** for recording and communicating non-conformities, suggestions and notes ensures effective continuous improvement arising from the audit findings.

# DNV Summit

Using DNV Summit you can:

- Define audit scope based on particular criteria
- Score audits based on Optional Element Scoring (OES), Progressive Scoring System (PSS) or a customised scoring approach
- Integrate multiple audits based on the same protocol when working as part of a team
- Calculate scores and assign award levels
- Attach notes to questions and flag for verification
- Define Noteworthy Efforts and Notable Achievements
- Define Suggestions and Critical Suggestions
- Omit questions not applicable to the audit
- Generate a wide range of reports
- Print off working copies
- Export and Import audits

## Management System Assessment Software for faster auditing, better measurement and improved performance

DNV Summit is equally suited for use in official evaluations by external auditors or internal audits for continuous development and improvement.

### Flexible

- Fully customisable assessment scope
- Compatible with standard or customised protocols
- Perform audits on-line or use working copy for subsequent scoring in Summit
- Input maximum, zero or not applicable scores at multiple levels

### User-Friendly

- Intuitive Microsoft Windows™ Interface with browser access to all levels
- You record your findings and Summit calculates the score
- Detailed on-line tutorial and help system

### Fully-Featured

- Generate audit summaries with tables and graphs of the Award
- Generate summary reports in Microsoft Word
- Create working copy, not-applicable, verification, and completed reports directly within MS Access
- View auditor instructions, suggestions for improvement, noteworthy efforts, verification notes and non-conformities instantaneously

### System Requirements

- Summit is compatible with Microsoft Windows 98, NT 4.0, ME, 2000 or XP
- Approximately 15MB of installation space available
- 32MB RAM (minimum) – 80MB Ram (recommended)
- Microsoft Word 97, 2000, 2002 or 2003 must be installed on the target machine
- Microsoft Access 97, 2000, 2002 or 2003 must be installed on the target machine
