

## DIGITAL SOLUTIONS

# NAVIGATOR SHORE

With Navigator Shore software we bring vessels closer to ship management and provide information and statistics from Navigator modules implemented onboard.

### Purpose

Navigator Shore is our office module that provides you with data and statistics for monitoring and analysis of crew, work and rest and certificates of your fleet. It is web-based and exchange data with the Navigator modules that are in use onboard in a simple and effective way.

### Features

Reports generated onboard are effectively transferred to your Navigator Shore module.

- Navigator Shore combined with Navigator Port :
  - Overview of vessel, certificates, crew and passenger lists, voyage history, stores, addresses, Mastes' Notes, vessel particulars and more
  - Monitoring of onboard installations and weekly updates
- Navigator Shore combined with Navigator Work and Rest module:
  - Highlights compliance with relevant international and national legislation on seafarers' work and rest hours
  - Shows non-conformities (number of hours and percentage) for entire fleet, per ship and down to individual crew member
  - Distinguishes different types of work, making it possible for you to carry out root-cause analysis of non-conformities

### General features:

- Data is sent automatically from ship to shore for processing
- You can sort data by fleet, vessels, and crew

### Key benefits:

- Exchange of data such as crew lists and vessel certificates
- Monitoring of installation and weekly updates
- Analysis of work and rest hours
- Demonstration of compliance with legislation such as MLC 2006, STCW 2010 and ILO 180
- No installation required, fully web-based service
- Ships that already use Navigator Port can easily upgrade with Navigator Shore
